# PowerGlass *Classroom Studio*
A fully equipped teaching station to engage students in learning
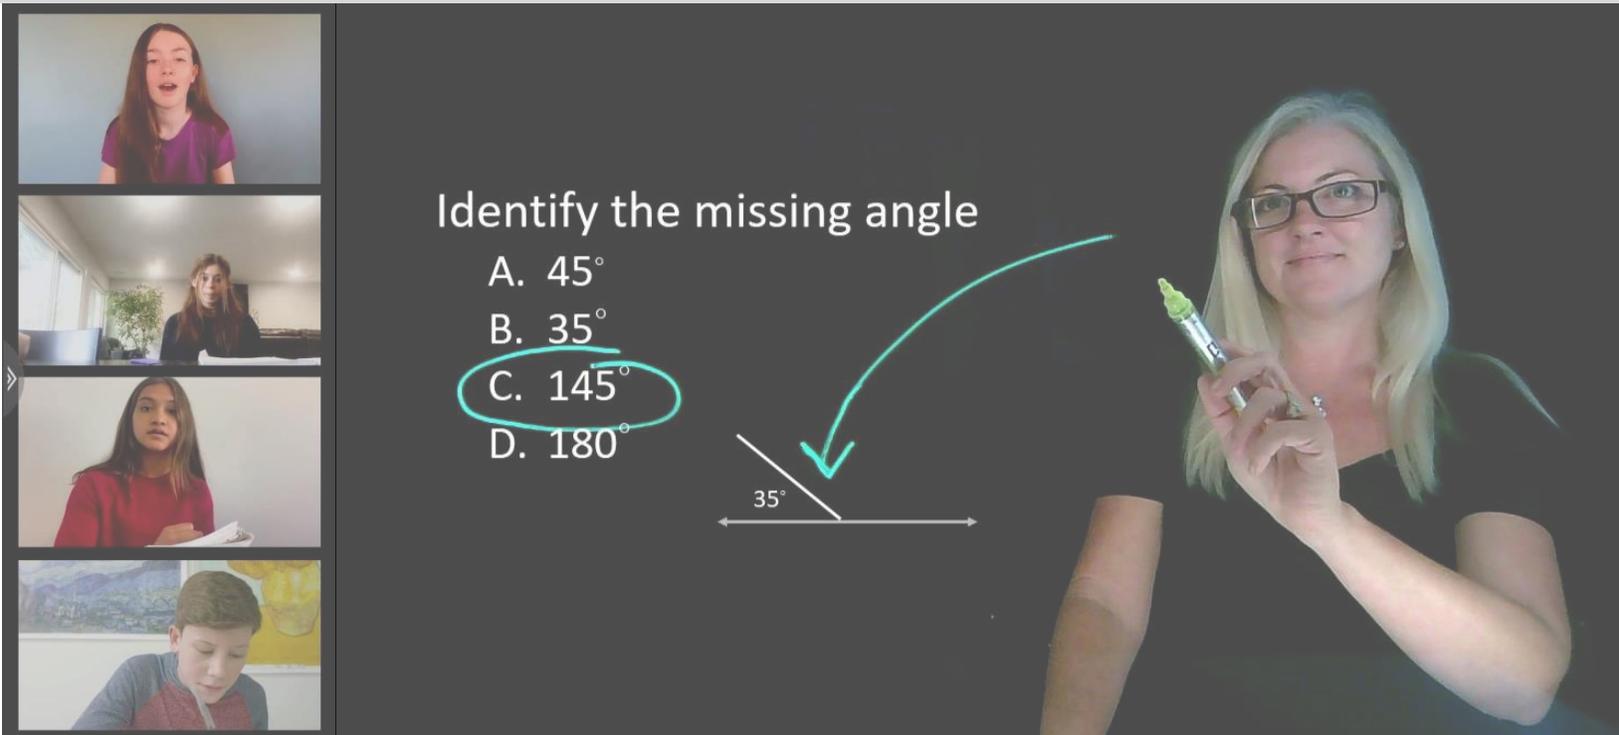

The PowerGlass *Classroom Studio* is a new and highly engaging classroom presentation solution designed to dramatically improve and positively impact learning in remote, hybrid and in-person classroom environments. Delivered as a complete, ready-to-use system, the **PowerGlass *Classroom Studio*** combines a transparent light board with built-in camera and software, integrated into a fully functional teaching station. PowerGlass also serves as a unique presentation resource to dynamically enhance teacher presentations and professional learning opportunities.

Your face and writing are in the same frame, delivering embodied learning that drives engagement.

Your body gestures and writing are larger than life on classroom screens, and crystal clear on distance learners' laptops.

Every student, whether in-class or remote, feels a personal connection with the instructor.

The PowerGlass *Classroom Studio* is a fully integrated, ready-to-use Classroom Presentation Solution designed to dramatically improve learning in remote, hybrid and in-person classrooms. PowerGlass is also a powerful teacher presentation resource and will facilitate more impactful professional learning.

PowerGlass – A *clear* way to dramatically impact learning.

Solution Includes	Benefits
Transparent light board, eGlass from Hovercam, with built-in camera, microphone and software.	Integrated system captures the teacher's face and handwritten annotations for projection to any local or remotely connected student.
Sit-to-stand desk. Includes intelligent integrated desk docking station providing single plug-in for teacher laptop. Includes wiring management for required electronic components.	Reduces teacher fatigue for improved instructor ergonomics and overall health
Confidence monitor (27-inch) with integrated adjustable gas-filled pneumatic arm.	Perfectly positions instructors for natural eye contact and engagement with students.
Dedicated keyboard and mouse with slide out tray.	Promotes efficacy in managing classroom teaching and presentation.
Studio backdrop/stand.	Black background color ensures optimal visualization for instruction in remote and hybrid environments.
All components delivered, fully assembled and staged.	Solution is set up and completely ready to use in the classroom.
Professional Learning/Training for teachers and instructors.	Ensuring optimal integration of technology with school's pedagogical requirements.
Training for onsite technical support team.	Empowered to support teachers.
Ongoing support.	Reduced teacher downtime.
